The application should be reviewed for errors.

The amendment filed 6/18/02 is acknowledged. Claims 3 and 6-12 are being considered on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 3 and 6-12 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

No basis or support is found in the present specification for a concentration of any glycosylation inhibitor in the process of producing cellobiase with any *T. clypeatus* of "at least 0.05 mg/ml." The specification at page 8 recites a concentration of 0.05-5% w/v specifically for 2-deoxy-D-glucose, while original claim 3 pertain to a concentration of 0.05-5 mg/ml specifically for 2-deoxy-D-glucose using *T. clypeatus* IICB-411. It is noted that the amounts recited in the specification and claim 3 are not equivalent.

Therefore, this material raises the issue of new matter and should be deleted.

Claim 7 is rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 encompasses an improper Markush grouping because the term "and" is missing at the end of the listings for carbohydrates and agrowastes. Proper language is e.g. --selected from the group consisting of A,B, **AND** C--. See MPEP 2173.05(h)(a). Also the claim is

confusing in the phrase "glucose analogue D-glucosamine". The phrase "glucose analogue" appears redundant in this context and should be deleted.

The intended meaning of "dexoy nojirimycin" in claim 8 is uncertain. Is it "deoxynojirimycin"

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
